We Sparkle Responsibly

Here at …… we recognize that most glitter is made of plastic and can have a harmful impact on the environment.

Our centre is committed to using plastic free glitter alternatives that are fun for our kids but don't impact on the health of the environment.

We make the following pledge

☐ We have stopped buying or bringing in new glitter to the centre that is made of plastic

☐ If we already have plastic glitter at the centre, we will use and dispose of this responsibly to minimize the glitter getting into the environment

☐ We will use eco-friendly glitter alternatives like:

- nature's glitter
- making our own glitter out of sugar, sand, rice, table salt, sea or Epsom salts, or paper confetti
- biodegradable glitter.
